

September 2025

Wellness Center Renovations Project Update

Coming in September:

- Demolition work begins in the new Teen Services room
- Renovations will begin on a large section of the fitness floor
- Front circle desk will be removed
- Work on the main entrance of the Wellness Center will begin

August has come and gone, and we are pleased to announce that the new spaces for Wellbriety and Physical Therapy are officially open! Now that those areas are complete, Walker Construction has moved on to the next phase of the renovation. This month's work will begin in the new Teen Services room, the fitness floor, and the conference rooms.

Early on this work will be mostly demolition based, and still very noisy. We will continue to keep disposable ear plugs at our front desk for patrons that need them. Speaking of the front desk, you will soon notice a change in our check-in process. Our big circle front desk is being removed, and a temporary check-in station is now set up near our pro shop display area.

Towards the middle of September, renovations will begin in the main entrance. Once they begin working in that area, we will have signs up and prepared to guide side doors that will help everyone safely enter the building.

It's exciting to see the building transform and create new spaces for our community! Stay tuned and keep following along.
