

December 2025

# Wellness Center Renovations Project Update

## Coming in December:

- Patrons will have access to half of the basketball court
- Mural on the gym wall will be completed
- Renovation on the main fitness floor will be completed

During the month of December, we will see renovation work finish up on the main fitness floor. Once the final section of the fitness floor is completed, we will move the fitness equipment out of the racquetball room and back onto the main floor – this will be our last big fitness equipment move! Work will continue in the new conference rooms and women's locker room throughout the month.

Starting December 8<sup>th</sup> renovation work on the basketball court will force us to close half of the court to allow the electricians to install our new lighting system. During this time, we will offer noon ball over at the Coeur Center for our patrons that prefer to play full court games. As soon as we can re-open the Wellness Center court fully, we'll make an announcement on our Facebook page and post signage. Thank you for your understanding!

Late December to early January we will begin the process of bringing all of our pool equipment online and testing it to make sure everything is working correctly in preparation for the pool to open back up in next month!
